

## SAY GOODBYE TO YOUR STICKMEN!

### We partnered with the best.

Quickly build home exercise programs by choosing from a large and accurate data base. Print exercise programs and send them by email. Save programs as a PDF and attach these in your patient's file. Its fast, easy and automatic because Physiotec comes baked right in.

Save time with Practice Pro, because Physiotec is fully integrated. Our partnership allows therapists to create HEPs through our system during their daily operation, and merges the information directly into the patient's medical records.

With the intuitive and well-designed Physiotec application it's easy to incorporate the protocols into your everyday exercise prescriptions. Simply login to your Practice Pro account as usual, specify exercises you are looking for, assign them to a client, send and print it. Patients have access to simple and easy printed handouts with photos and instructions describing the exercises, as well as a professional online video demonstrating each exercise.
