

Practice Pro comes with fully-integrated outcomes tracking to help you manage care quality on a per-location, per-therapist level.

### Be Confident With Payers

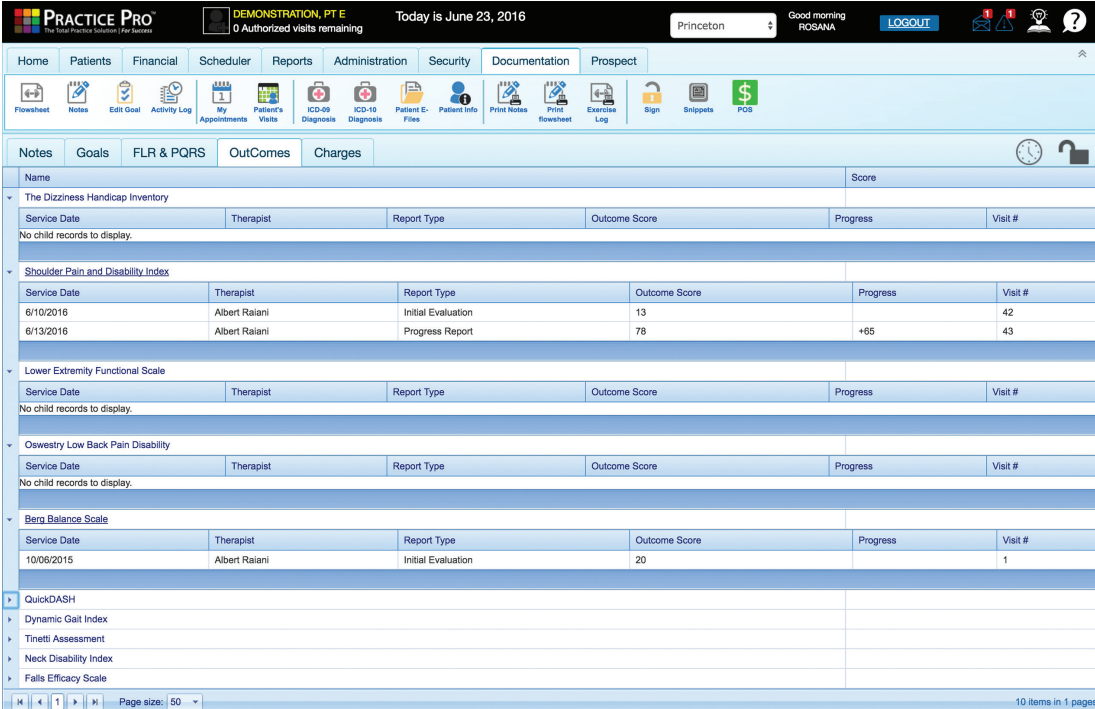

When payers hold your feet to the fire, you have the data to extinguish it. Now you can go into insurance contract negotiations with confidence.

### Patient Satisfaction

Recovery is the name of the game. With our outcomes management, you will help your patients recover faster.

### Manage Your Success

Set performance goals for your therapists, and track their progress. Practice Pro gives you everything you need, for success.

The screenshot shows the Practice Pro software interface. At the top, there is a header with the Practice Pro logo, a user profile for 'Princeton' (Good morning ROSANA), and a 'LOGOUT' button. Below the header is a navigation menu with tabs for Home, Patients, Financial, Scheduler, Reports, Administration, Security, Documentation, and Prospect. A toolbar contains various icons for functions like Flowchart, Notes, Edit Goal, Activity Log, My Appointments, Patient's Visits, ICD-99 Diagnosis, ICD-10 Diagnosis, Patient E-File, Patient Info, Print Notes, Print flowchart, Exercise Log, Sign, Snippets, and POS. The main content area is titled 'Outcomes' and displays a table of outcome data. The table has columns for Name, Service Date, Therapist, Report Type, Outcome Score, Progress, and Visit #. It lists several outcome categories: The Dizziness Handicap Inventory (no records), Shoulder Pain and Disability Index (records for 6/10/2016 and 6/13/2016), Lower Extremity Functional Scale (no records), Oswestry Low Back Pain Disability (no records), Berg Balance Scale (record for 10/06/2015), and QuickDASH (sub-sections for Dynamic Gait Index, Tinetti Assessment, Neck Disability Index, and Falls Efficacy Scale).

Name	Service Date	Therapist	Report Type	Outcome Score	Progress	Visit #
No child records to display.						
<b>Shoulder Pain and Disability Index</b>						
	6/10/2016	Albert Raiani	Initial Evaluation	13		42
	6/13/2016	Albert Raiani	Progress Report	78	+65	43
No child records to display.						
<b>Lower Extremity Functional Scale</b>						
No child records to display.						
<b>Oswestry Low Back Pain Disability</b>						
No child records to display.						
<b>Berg Balance Scale</b>						
	10/06/2015	Albert Raiani	Initial Evaluation	20		1
<b>QuickDASH</b>						
Dynamic Gait Index
