- Billing, and documentation all in one screen.
- Easily schedule recurring visits with quick and easy drag & drop, or copy and paste.
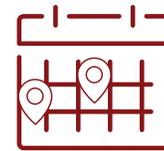

Manage Multiple Therapists
Manage and view multiple therapists all on one screen.

Appointment Reminders
Reduce no-show appointments and improve continuity of care with automatic email, text or phone reminders.

Manage Multiple Therapists
Manage and view multiple therapists all on one screen.

Practice Pro comes with the industry's easiest scheduling software built-right in.

Our appointment scheduler is designed to be intuitive to use, while providing powerful features and putting critical patient information at your fingertips. Moving appointments is simple, with drag and drop scheduling. Appointments can be extended or shortened by dragging the edges of the appointment block. Appointments can also be copied, pasted, and set to reoccur. Right click menus provide quick access to expanded options.

Appointment blocks are colored to differentiate between different types of appointments, and statuses. These colors can be seen in the convenient appointment styles legend, and you can customize them to your heart's content.

Copays and alerts can be seen directly on the appointment, and hovering on our patient info icon will give you more details. This allows you to see the types of appointments, patient financials, and notes or precautions on the patient's case. Right-clicking on an appointment will give you further access to patient-specific info and a frequently used reports collection. Our scheduling software also has a built in warning engine, that displays any patients who have an expired, missing or exceeded authorization. Managing these situations is easy by choosing one of the suggested reports for further details.
