

'Why' matters.

Every EMR claims to have the “fastest” physical therapy documentation software. But what they don't tell you is you'll have to use the examination template they provide. It may have 60% more content than you need for your evaluation, or lack content that you prefer. **Is that really the fastest?**

Practice Pro not only gives you the fastest documentation in the business, but we achieve this by allowing you to customize the templates we provide, or create your own custom templates easily.

After all, fast means working the way you do.

Paperless Documentation

Paper out. Precision in. Start with an existing library of templates or create your own.

Comprehensive, Yet Easy

Every clinic needs a 360° view of records – be it patient, physician, or insurance.

Multi Disciplinary

Our documentation module is customized for PT, OT, Speech Language Pathology, and Pediatric.

Medicare & Compliance Simplified

You take care of the patients. Let Practice Pro take care of the compliance. We know the path through the maze.

Clinical Documentation in Practice Pro is fast, flexible and easy to use.

Libraries, templates and content are filtered by body part for easy access. You can start with our pre-made examination profiles, or customize the content and save your own templates.

With built-in Goal Tracking, Medicare Reporting and Outcome Tests, therapists have all the evaluative tools they need to document quickly and compliantly in our physical therapy documentation software. Create a streamlined Plan of Care or roll-forward notes for Re-Evaluations and Progress Notes with a click of a button.

Printed notes are easy to read and include your company's own branding. You can also use our built-in electronic fax feature to send your documentation to other providers.

Daily Notes are faster than ever with an integrated Flowsheet experience. Your charges are generated accurately and compliantly as you document using our powerful billing engine. Practice Pro will handle all the so you can focus more on patient care.

Documentation Templates

Physical, Occupational, Pediatric and Speech therapists can now create comprehensive and compliant-ready documentation that can be accessed anywhere, anytime. Our Documentation Library has grown and evolved over the years by hundreds of therapists and other office staff. You can begin to use these customized templates immediately, revise them to fit your needs, or go ahead and create your own custom templates easily with our template builder. Short on time? We offer custom development services too, so we can create custom templates just the way you want.

Auto-Snippets

Avoid having to rewrite common entries over and over again by using our intelligent "Auto-Snippet" feature. This allows you to write and save an entire paragraph and assign a keyword that triggers it, saving you hours of time.

Note Forward

Our Note Forward feature allows you to create subsequent notes fast and easy as your treatment progresses. It simply creates a copy of the previous notes and rolls it forward to give you a starting point for your next entry.
